PROFILE

Passionate and detail-oriented Front-End Developer with expertise in building responsive, user-friendly web applications. Skilled in **Angular**, **HTML**, **CSS**, **JavaScript**, and modern frameworks like **Bootstrap** and **Tailwind CSS**, ensuring seamless experiences across devices. Proficient in integrating RESTful APIs, handling authentication mechanisms, and optimizing web performance. Strong understanding of UI/UX principles and a commitment to writing clean, maintainable code.

EDUCATION

Bachelor of Science - Department of Computer Science 06/2024
Ain Shams University

Diploma -Front-End Development (Angular Framework) 02/2024
Route Academy

PROFESSIONAL EXPERIENCE

public relations & Logistical Operation 2022 – 2024
Health House - Medical Supplies Company

Communicate with platform agents like Amazon, Jumia, Noon to keep updated with workflow and get the feedback of customers and figure out the best solution to satisfy the customer needs

Costumer Support 2021 – 2022
Raya Costumer - Service Company

being in touch with several agents knowing about their problems and finding the best approach to solve these problems in \efficient way and time

Front end Trainee 10/2024 – 02/2025
Web Master -Tech Solutions

Successfully completed a comprehensive front-end development training program, gaining hands-on experience in building dynamic web applications. The training covered **responsive design**, **CSS frameworks**, **JavaScript best practices**, and **API integration**, with a strong focus on creating visually appealing and high-performing web solutions.

PROJECTS

Portfolios

HTML, CSS, Bootstrap, Tailwind CSS

Designed and developed responsive portfolio websites showcasing interactive UI/UX, smooth animations, and seamless user experience across devices,Built engaging user interfaces ensuring accessibility and cross-browser compatibility.

CRUD Systems & Login System & Bookmarking App

Java Script

Developed a simple login/register system with JavaScript validation using regex and local storage for data persistence,A fully functional CRUD system implementing create, read, update, delete, and search operations,A bookmarking application allowing users to store and manage website links.

Weather App

API Integration & JavaScript

Developed a weather application that fetches real-time data from an API with a fully responsive design,Created a news aggregator that dynamically imports and displays the latest articles using an API.

Restaurant Portfolio

JavaScript & jQuery Project

I developed a **dynamic restaurant portfolio website** using **JavaScript and jQuery**, integrating **APIs** to fetch and display real-time data such as menu items and customer reviews. The project leverages **jQuery features** like **AJAX** for seamless data retrieval, **event handling** for interactive navigation, and **animations** for a smooth user experience. The website is fully **responsive**, ensuring optimal display across different devices, with a modern UI that enhances user engagement.

E-Commerce Platform

Angular Projects

I developed a fully responsive e-commerce platform using Angular, designed with modular architecture for scalability and performance. The application follows the **lazy loading** approach, ensuring optimized loading times by separating features into dedicated modules.

Key components include **Products, Cart, and Checkout**, each managed efficiently through **Angular services** to handle authentication, product listings, and cart operations. **AuthGuard**s secure restricted routes, while **token-based authentication** ensures safe user access. The project incorporates **data binding**, including **two-way binding** for form inputs, **property binding** for dynamic UI updates, and **event binding** for seamless user interactions.

SKILLS

Programming

HTML , CSS , JavaScript, TypeScript ,C#

FrameWorks

BootStrap , Tailwind , JQuery , Angular

API Integration

RESTful APIs, Fetch, Axios, Authentication, Postman , Swagger

Version Control

Git, GitHub, XMAPP
